Invented for life

# QuickPay

Settlements done ahead of the clock.

# Your SAP-native platform for effortless expense management

QuickPay is a lightweight, AI-enabled expense and reimbursement solution built entirely on SAP BTP. It handles every step, from employee voucher submission to manager approval and final payment posting, without bolting on heavy third-party software.

Whether it's travel claims, out-of-pocket costs, non-PO payments, or on-duty expenses, QuickPay brings everything under one roof. It connects seamlessly with S/4HANA and SuccessFactors, operates strictly within your governance rules, and guarantees transparency at every step.

## Intelligent automation and zero disruption with QuickPay

From receipt to posting, every feature cuts effort, reduces sprawl, and keeps finance in control.

### **SAP-native without overheads**

No third-party bloat, no rip-and-replace. Deploy in your existing SAP landscape from day one.

### **AI-powered receipt capture**

Point, snap, done.

AI reads scanned bills and auto-populates claim fields, instantly slashing manual entry and errors.

### **Deep S/4HANA & SuccessFactors sync**

Master data, approval hierarchies, and posting rules flow in real-time. No duplicate setup, no data drift.

### **Configurable rules and workflows**

Align every approval chain to your internal policy. A kiosk-style setup where IT stays in control without having to worry about code.

### **Built-in audit trail**

Every voucher, approval, and posting is logged end-to-end, making compliance reviews fast and more efficient.

### **Cost-effective and enterprise-ready**

Enterprise-grade functionality at a fraction of the license cost, ideal for organizations that need to do more with less.

# Real journeys. Real results.

See how QuickPay improves the daily experience across the expense chain.

## Field Sales Employee

Snaps a hotel bill mid-trip. AI extracts the amount and merchant instantly. The claim is submitted and approved instantly within defined workflows.

## Finance Controller

All claims flow directly into S/4HANA with posting rules pre-applied. Month-end close tightens from days to hours.

## HR Operations

Employee hierarchy and travel policy changes in SuccessFactors sync automatically - no manual workarounds, no policy breach risk.

## Enterprise-grade financial operations, without the friction

QuickPay is a unique SAP-native expense tool that features AI-driven receipt capture, deep ERP integration, and configurable compliance workflows, all at a lower cost and complexity.

**No re-platforming. No steep licenses. No new system for employees to learn.**

Just faster claims, cleaner books, and happier employees, delivered from within the SAP environment you already trust.
